

Gas Discharge Tubes(GDT)

3RA-5SS Series

Description

Gas discharge tubes (GDT) use noble gasses enclosed in ceramic tubes to provide an alternate circuit path for voltage spikes. The ceramic envelope and with nickel connectors allow for high loads. 3RA-5SS Gas Discharge Tubes (GDT) series has a surge rating of 5kA, 8/20 μ s. Offered in a Squared Surface Mount package, which helps to make pick and place on PCB process easier.

This GDT series is perfectly suited for broadband equipment applications. The GDT's low off-state capacitance is compatible with high bandwidth applications and this capacitance loading value does not vary if the voltage across the GDT changes.

3RA-5SS Gas Discharge Tube (GDT) series are specifically designed for protection of electrical, multimedia, and communication equipment against over voltage transients in surface mount assembly applications.

Electrical symbol

a = Tip
 b = Ring
 e = Ground
 (center electrode)

Features

- | Excellent response to fast rising transients
- | Stable breakdown voltage
- | GHz working frequency
- | 8/20 μ s Impulse current capability: 5KA
- | Surface Mount package
- | Non-Radioactive
- | Ultra Low capacitance (<1pF)
- | High insulation resistance
- | Lead-free and RoHS compliant
- | Size: 5mm*5mm*7.5mm
- | Storage and operational temperature: -40~+90°C

Applications

- | | |
|-------------------------|----------------------------------|
| Communication equipment | ADSL equipment, including ADSL2+ |
| CATV equipment | XDSL equipment |
| Data lines | Satellite and CATV equipment |
| Power supplies | Test equipment |
| Telecom SLIC protection | Consumer electronics |
| Broadband equipment | |
